

Testers Feedback Report

Testers Community

The objective of this report is to provide a comprehensive evaluation of the app's performance, usability, and functionality across various devices and operating systems. This includes identifying potential issues, assessing user experience, and offering actionable recommendations to enhance the app's quality and compliance with industry standards.

App Name: Erebor - Wealth Management

App URL:

<https://play.google.com/store/apps/details?id=com.jsphemil.spendingtracker>

Objective: Detailed feedback about the app after testing it on various devices and SDKs.

Testing Approach:

- Conducted testing on a variety of devices and operating systems to ensure compatibility and performance.
- Evaluated app functionality, usability, and responsiveness under real-world usage scenarios.
- Identified and documented issues, including crashes, bugs, and UX / UI inconsistencies
- Assessed compliance with data protection regulations and app store requirements

Findings:

- The testing process revealed that the app performed exceptionally well across all devices and SDK configurations.
- No critical issues such as crashes or bugs were encountered during the testing phase.
- All functionalities of the app were thoroughly examined, and they operated as intended without any discrepancies.

Opportunities for Enhancement for Erebor - Wealth Management App

1) Dynamic Walkthrough for New Users

Observation:

Currently, the app does not provide a dynamic walkthrough or onboarding process for new users to guide them through its features and functionalities.

Why It Matters:

A dynamic walkthrough can help users become familiar with the app's features quickly, reducing any learning curve and frustration. This enhances user satisfaction from the start and encourages continued use of the app.

Possible Enhancements:

- **Interactive Tutorial:** Introduce an interactive tutorial that highlights key features and functionalities as users navigate through the app for the first time.
- **Tooltips:** Implement tooltips or pop-ups that provide additional context for various features when users first encounter them.
- **Skip or Replay Option:** Ensure users can choose to skip the tutorial or replay it later through settings if they want a refresher.

2) Limited Login Options

Observation:

The app currently only allows for local data storage with no login options available for user accounts.

Why It Matters:

Incorporating additional login options, such as Google Sign-in, can significantly enhance user convenience. This would make it simpler for users to access their data on multiple devices and improve overall security while maintaining the app's commitment to user privacy.

Possible Enhancements:

- **Google Sign-in Integration:** Add an option for users to sign in using their Google account for added convenience and security.
- **User Account Option:** Consider allowing users to create a simple account for those who wish to synchronize their data across devices while ensuring data remains private first and foremost.

3) Sign-In with Email Option

Observation:

There's currently no option for users to sign in with an email and password combination, limiting user choice in accessing the app.

Why It Matters:

Providing an email sign-in option can cater to a broader audience who may prefer managing their accounts through traditional email credentials. This flexibility can enhance user experience and trust in the app.

Possible Enhancements:

- **Email and Password Configuration:** Implement a feature that allows users to create an account with their email address and a secure password.
 - **Password Recovery Option:** Include a password recovery mechanism to assist users in regaining access if they forget their credentials, enhancing usability and security.
-

Additional Recommendations for an Enhanced Experience

- **Feedback Mechanism:** Consider adding a feedback option within the app. This allows users to suggest improvements or report issues, fostering an engaging user community while providing valuable insights for ongoing enhancements.
- **Regular Updates on New Features:** Maintain a section within the app where users can view updates on new features or changes, ensuring they are aware of how to utilize new tools effectively.
- **Enhanced Data Visualization:** Offer advanced charts or graphs that provide users with deep insights into their spending habits and financial trends, making it easier for them to understand their financial situation at a glance.
- **User Support Resources:** Consider adding a comprehensive FAQ and support section to assist users with common questions or technical challenges without needing direct support.
- **Customization Options:** Allow users to customize dashboards or views within the app to highlight the financial information that matters most to them, enhancing their overall experience.

By implementing these friendly and constructive enhancements, the **Erebor - Wealth Management** app can provide a more robust and user-centric experience for managing personal finances effectively.

Best regards,
Testers Community Team
