

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Erebor - Wealth Management

App URL:

<https://play.google.com/store/apps/details?id=com.jsphemil.spendingtracker>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

We used a paid testing provider to gain comprehensive and detailed feedback on the app. Additionally, we reached out to some of our target users, including personal finance enthusiasts, to gather real-world insights and ensure the app meets user needs effectively.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers engaged actively, providing insightful feedback on app usability, features, and functionality. Their suggestions prompted us to prioritize user

experience enhancements, leading to significant refinements that increased overall satisfaction and app usability.

4) Provide a summary of the feedback that you received from testers. Include how you collected the feedback.

Testers highlighted the need for a dynamic walkthrough, additional login options, and email sign-in features. Feedback was collected through surveys, direct communication, and usability sessions, ensuring we addressed user concerns effectively and improved the app's functionality.

5) Who is the intended audience for your app?

Erebor is designed for individuals seeking effective personal finance management. It caters to users who want to track their finances securely and conveniently, including those with multiple accounts, diverse currencies, and a desire for offline access to their financial data.

6) Describe how your app provides value to the users.

Erebor empowers users to manage their finances effortlessly by providing a secure, offline platform for tracking income, expenses, and investments. With

features like budgeting, net worth tracking, and transaction history export, users gain valuable insights into their financial health.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

Based on user feedback, we are implementing a dynamic walkthrough for new users, adding Google Sign-in and email sign-in options. These enhancements aim to improve onboarding and accessibility, ensuring a more user-friendly experience for all users.

9) How did you decide that your app is ready for production?

After thorough testing and incorporating valuable feedback from users, we ensured that the app is stable, user-friendly, and fully functional. Our commitment to privacy and offline accessibility aligns with user expectations, making it ready for successful deployment.

10) What did you do differently this time?

This time, we focused on enhancing user onboarding by incorporating a dynamic walkthrough and expanding login options based on tester feedback. These changes significantly improved usability and engagement, resulting in a more polished app ready for production.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
